Mountain Weather Forecast

Snowdonia National Park

Forecast valid from 00:00 on Saturday 10 Sep 2022 until 23:59 on Sunday 11 Sep 2022

Forecast Issued on Friday 09 Sep 2022 at 14:51

Confidence: High confidence for the weather becoming more settled this weekend, and a change to more unsettled conditions again early next week. Lower confidence though regarding rainfall details during the early to middle part of next week, with the potential for it to turn warm and humid for a while, and with fresher, but more settled weather gradually expected to arrive from the northwest.

Headline for Saturday 10 Sep 2022: Cloudy at first with some mist or fog patches and a chance of a shower. Becoming brighter, then sunny spells later and clear spells in the evening.

Mountain weather hazards on Saturday 10 Sep 2022

Forecast for Saturday 10 Sep 2022

Weather: Mostly cloudy to start, with the cloud covering the hill tops at first and with cloud bases down to around 500m at times, giving some mist or fog patches. A few mist patches also possible in some valleys where any cloud breaks occur. A small chance of a shower in the morning too. Cloud lifting by the middle of the day to allow some sunny intervals to develop in the afternoon, then a fine evening with late sunshine followed by clear spells after dusk.

Chance of cloud-free hill tops above 800m: 20% or less at first, rising to around 50% by mid to late morning, then rising above 70% for the afternoon and evening.

Low Cloud and visibility: Poor or very poor at first in mist and fog patches, but improving to become very good from late morning onwards.

Meteorologist's View

Although it is likely to feel pleasant in any afternoon sunshine in the valleys, temperatures will remain on the chilly side near to the summits, so some warm clothing is still advised.

Forecast for Sunday 11 Sep 2022

Weather: Dry during the day with patchy cloud and any early mist lifting to allow some sunny spells to develop. Feeling warm. Cloud then thickening from the west during the evening with some patchy light rain developing, and turning misty again near the summits as the cloud base starts to lower.

Maximum wind: East or southeast 10 to 15mph, with gusts 20mph, turning southerly for the afternoon and evening and increasing 15 to 20mph, with gusts 25, occasionally perhaps 30mph.

Chance of cloud-free hill tops above 800m: Around 50% at first, increasing to 80% or more during the morning, then lowering to 30% or less through the evening.

Low Cloud and visibility: Moderate in early mist patches, then becoming good or very good, before dropping to moderate near the summits during the evening.

Temperature: **Valleys:** Plus 12 Celsius, rising to Plus 21 Celsius.
At 800m: Plus 8 Celsius, rising to Plus 15 Celsius.
Freezing level: Above the summits throughout.
